FORENSIC ENGINEERING AND FAILURE INVESTIGATIONS

The Electrical Forensic Engineering division of Brosz and Associates is pleased to announce the successful conclusion of a trial involving a major international paper company and a nationally known motor rewind service shop.

The Forensic Engineering team at Brosz and Associates was able to contribute its expertise and thus assist the law firm for the Paper Company in successfully recovering more than \$1,000,000.00. The lawsuit arose as a result of the motor shop's failure to properly repair a large D.C. electric motor armature.

The subsequent court decision in favor of the Paper Company came after a year's scrutiny of the evidence by the trial judge in his one hundred page ruling judgment.
